01 / HydroSense app flowchart

Android application workflow | Based on the current source code | Authentication, navigation, monitoring and control

H = return to Home / main navigation. L = return to Login. Diamonds = decisions; slanted boxes = displayed data.

App boundary: Firebase carries commands and telemetry. Controller automation and physical filtration belong in Flowchart 02.

Filter life uses measured runtime and sensor data with a model trained on generated data. Missing measurements show a waiting state.
